Nightlies

[builds](#) ^[1] [nightlies](#) ^[2] [QA](#) ^[3] [roottest](#) ^[4]

Here you find the results of the different "nightly" run test procedures.

- [SPI nightly build results](#) ^[5]
ROOT should build and and run the tests without errors and warnings.
- [Coding convention checker results](#) ^[6]
Results of the ROOT coding style violations checker.
- [FNAL nightly build and roottest results](#) ^[7]
Results of running the `roottest` suite.
- [FNAL standalone CINT nightly build results](#) ^[8]
Results of the standalone CINT build and tests.

The roottest suite

- [How to add a test to roottest](#) ^[9]
