# Nightlies

[builds](#) <sup>[1]</sup>   [nightlies](#) <sup>[2]</sup>   [QA](#) <sup>[3]</sup>   [roottest](#) <sup>[4]</sup>

Here you find the results of the different "nightly" run test procedures.

- [SPI nightly build results](#) <sup>[5]</sup>  
ROOT should build and and run the tests without errors and warnings.
- [Coding convention checker results](#) <sup>[6]</sup>  
Results of the ROOT coding style violations checker.
- [FNAL nightly build and roottest results](#) <sup>[7]</sup>  
Results of running the `roottest` suite.
- [FNAL standalone CINT nightly build results](#) <sup>[8]</sup>  
Results of the standalone CINT build and tests.

The roottest suite

- [How to add a test to roottest](#) <sup>[9]</sup>
