HowTo's

These HOWTO's describe in details specific operations or procedures that are part of almost every ROOT session or application. They are classified under the known chapters of the [User's Guide](#) ^[1] with which they are related to. Let us know the subjects on which you would like to see other HOWTO's. Do not hesitate to contact us at rootdev@cern.ch ^[2]

- [Getting Started](#)
 - [Histograms](#)
 - [Fitting Histograms](#)
 - [CINT the C++ Interpreter](#)
 - [Graphics and Graphical User Interface](#)
 - [Input/Output](#)
 - [Trees](#)
 - [Linear Algebra in ROOT](#)
 - [Adding a Class](#)
 - [Python and Ruby Interfaces](#)
 - [Tutorials and Tests](#)
 - [VMC \(Virtual Monte Carlo\)](#)
 - [Writing a Graphical User Interface](#)
 - [Threads](#)
 - [Automatic HTML Documentation](#)
 - [Miscellaneous](#)
-

Getting Started

- [How to Convert HBOOK/PAW Files to ROOT Files?](#) ^[3]
- [How to Use ROOT under Windows NT?](#) ^[4]
- [How to Convert from PAW?](#) ^[5]

Histograms

- [How to Use the Histogram Classes?](#) ^[6]
- [How to Merge Histogram Files?](#) ^[7]

Fitting Histograms

- [How to fit using the FitPanel?](#) ^[8]
- [How to Fit Histograms or Data Points?](#) ^[9]
- [How to Find Peaks in Histograms?](#) ^[10]
- [How to Use ROOT Statistic Classes?](#) ^[11]

CINT the C++ Interpreter

- [How to Understand a Class Structure?](#) ^[12]
- [How to Call CERNLIB Routines from the Interpreter?](#) ^[13]

Graphics and Graphical User Interface

- [How to Draw Objects?](#) ^[14]

- [How to Pick Objects?](#) ^[15]
- [How to Use the Graphics Editor?](#) ^[16]
- [How to Create an Axis with Time Units?](#) ^[17]
- [How to Create or Modify a Style?](#) ^[18]
- [How to Use the PostScript Interface?](#) ^[19]
- [How to define a smooth color palette?](#) ^[20]
- [How to Have Two Different Color Palettes on the Same Canvas?](#) ^[21]
- [How to let graphics primitives respond to a mouse click ?](#) ^[22]
- [How to set ranges on axis ?](#) ^[23]
- [How to embed a canvas in external applications ?](#) ^[24]

Input/Output

- [How to Write Objects to a File?](#) ^[25]
- [How to Read Objects from a File?](#) ^[26]
- [How to Access ROOT Files Remotely via the rootd server?](#) ^[27]
- [How to Access ROOT Files Remotely via RFIO?](#) ^[28]
- [How to Read a ROOT File via the Web?](#) ^[29]
- [How to Read a ROOT File via Amazon S3?](#) ^[30]
- [How to Read a ROOT File via Google Storage?](#) ^[31]

Trees

- [How to Create and Fill a Tree?](#) ^[32]
- [How to read a Tree?](#) ^[33]
- [How to Use Chains \(List of Files\)?](#) ^[34]

Linear Algebra in ROOT

- [How to to Create and Fill a Matrix?](#) ^[35]
- [How to Invert a Matrix?](#) ^[36]
- [How to Perform a Linear Fit?](#) ^[37]

Adding a Class

- [Adding your class to ROOT: ClassDef\(\)](#) ^[38]
- [Creating a dictionary for your class.](#) ^[39]

Python and Ruby Interfaces

- [How to use Use the Python PyROOT Interpreter?](#) ^[40]
- [How to Use the Ruby Interpreter?](#) ^[41]

Tutorials and Tests

- [How to Compile and Link with the ROOT Libraries?](#) ^[42]

VMC (Virtual Monte Carlo)

- [How to Use Virtual Monte Carlo?](#) ^[43]

Writing a Graphical User Interface

- [How to Use the ROOT GUI Classes?](#) ^[44]
- [How to Use the Signal/Slot Communication Mechanism?](#) ^[45]
- [How to Use the ROOT GUI Builder?](#) ^[46]

Threads

- [How to Use the ROOT Thread Classes?](#) ^[47]

Automatic HTML Documentation

- [How to Generate HTML Documentation?](#) ^[48]

Miscellaneous

- How to Use the FOAM package?
- [How to Use Mathematica From ROOT ?](#) ^[49]
