ROOT Users Workshop, 11 - 14 March, Saas-Fee

Featuring ROOT 6 - The Next Generation

Workshop Poster ^[1], **First Bulletin** ^[2], **Second Bulletin** ^[3]

Since almost two decades, **ROOT** has established itself as the framework for HENP data processing and analysis. The LHC upgrade program and the new experiments being designed at CERN and elsewhere will pose even more formidable challenges in terms of data complexity and size. The new parallel and heterogeneous computing architectures that are either announced or already available will call for a deep rethinking of the code and the data structures to be exploited efficiently.

This workshop, following from a successful [series of such events](#) ^[4], will allow you to learn in detail about the new ROOT 6 and will help shape the future evolution of ROOT.

Topics

- ROOT roadmap
- The new cling C++11 interpreter
- New persistency features
- Concurrency and ROOT
- Distributed data analysis with PROOF and PoD
- ROOT on mobile
- ROOT in Javascript
- Latest on math tools and techniques
- Moving ROOT to C++11
- User feedback

Abstract Submission

New abstract submission deadline is February 25th.

Abstract submission deadline is *February, 11th*.

For submitting an abstract please use the [workshop Indico page](#) ^[5].

Registration

New registration deadline is March 7th.

Registration deadline is *February, 28th*.

Conference fee: 150 CHF (covering 4 lunches, coffee breaks and a workshop dinner).

Students: Sponsorship is available, please contact [organizing committee](#) ^[6] for further information.

For registration please use the [workshop Indico page](#) ^[5].

Accommodation

Accommodation fee: 195 CHF/day (breakfast included). Double occupancy adds 115 CHF/day to the price. Dinner is available for extra 30 CHF/person.

The workshop venue is the [Schweizerhof](#) ^[7] hotel.

The participants will have rooms in either the Schweizerhof, [The Dom](#) ^[8], [Du Glacier](#) ^[9], [Europa](#) ^[10], [Allalin](#) ^[11] or the [Saaserhof](#) ^[12] hotels.

All hotels are **** and within close proximity.

The assignment to the hotels will be made by the organization.

Organizing Committee

- Philippe Canal, FNAL
- Federico Carminati, CERN
- Axel Naumann, CERN
- Eddy Offermann
- Fons Rademakers, CERN
- Ulla Tihinen, CERN
